<b>23. Problem: (use additional Sheets if necessary)</b> The Client Test is having problems internally displaying the JAVA map pages generated by the EDG Search and Order Tool. . When the TS2 "imswelcome/plain" web application is executed, The "Java is enabled" never displays and the Geographinc Region screen is never displayed (to allow for the viewing maps). The PVC and VATC machines currently do not have access to any plug-ins that provide the graphic capability that will to allow these tests to run successfully. The internal version of EDG 3.4b2 and EDG 3.4 will not work without them. (The "lyta.gsfc.gov80" configuration work and currently has the required configuration.						
<b>24. Proposed Solution: (use additional sheets if necessary)</b> Install the Sun Java plug-in "plug-in-12-sparc.tar.Z" located on "lemmings" in the /data0/ CM_INBOX. This is the plug-in that exists on the GSFC machine that works for Netscape 4.7.						
<b>25. Alternate Solution: (use additional sheets if necessary)</b> None						
<b>26. Consequences if Change(s) are not approved: (use additional sheets if necessary)</b> The testing group will have to await the Solaris 8 upgrade of Netscape 4.78. The netscape 4.78 configuration when tested, works on Sun machines.						
<b>27. Justification for Emergency (If Block 15 is "Emergency"):</b> The client group has experienced this problem for some and been unable to get support in identifying and correcting the problem.
